1. Introduction

This Offer Document is intended to provide Investors with relevant information in order to make an informed investment decision.

Energise Africa is raising debt for single organisations, through crowdfunding. Investors who invest in these bond instruments are investing in direct investments into single organisations and these are considered [high risk investments](#) by the UK regulator, the Financial Conduct Authority (FCA). Direct investments are also able to deliver high impact as investors can have a clear line of sight into the organisations and projects which are funded by the finance being raised through this specific offer. The FCA recommend investors to invest no more than 10% of their whole savings and investment portfolio in direct high risk investments and to spread your direct investments across projects, partners, platforms and investment products and not to allocate too much of your savings and investments in what are high risk investments.

This offer is brought to you by Lendahand Ethex Ltd trading as Energise Africa ("Energise Africa"), a joint venture between the Dutch impact investing platform Lendahand and the UK-based impact investment platform Ethex. Energise Africa has been supported by UK aid, Good Energies Foundation, and Partnerships for Green Growth & the Global Goals.

Energise Africa combines the strengths of both organisations in order to meet the challenge of mobilising UK-based retail investors to lend finance to businesses creating access to clean energy and climate action for people in emerging markets.

Disclaimer

The Directors of Energise Africa hereby declare that the information contained in this Offer Document is to the best of their knowledge, in accordance with the facts and contains no omission likely to affect its import. This document provides no advice on particular tax benefits that an investor may be eligible to claim in relation to an investment into the product offered. Tax incentives that may be available will vary depending on the personal circumstances of each investor. Those interested in investing should do so only after reading this document in full and taking appropriate financial and other advice.

a) Message from the executive management of Roam

Dear Reader,

Roam is an electric mobility company developing and deploying electric motorcycles and electric buses for emerging markets, starting in Kenya. The company was incorporated in Kenya in 2018 and is fully owned by a Swedish parent company.

Roam was founded with a vision to provide relevant electric mobility products for emerging markets that will allow low income groups to access affordable transport solutions and also off-set the largest amount of carbon emissions as possible.

Over the past 5 years Roam has been leading the electric mobility movement in East Africa, proving both the demand and viability through pilots and necessary policy work. Roam intends to leverage its broad network, proprietary technology and role as a market leader to achieve tremendous growth over the next few years with a focus on the deploying electric motorcycles and charging hubs in Kenya.

Our products are helping a large low income group, the motorcycle taxi entrepreneurs, to increase their earnings by 50% in a time of soaring petrol and food prices. Removing a petrol motorcycle from the road will offset as much as 1.84 tonnes of CO2 per year, and the estimated cumulative impact over the next 5 years for all Roam's products would account for 1.2% of Kenya's 2026 GHG emission reduction target. On top of that, Roam aims to provide direct and indirect jobs in the market.

During the past 5 years we have built the necessary foundation for electric mobility in Kenya and now we are venturing into an expansive phase with our electric motorcycle, the Roam Air. With this fundraising endeavour we'd like to invite YOU on this journey and help us deliver more motorcycles faster, to create real impact for both people and the environment.

Filip Lövström

3. Business Overview

a) About Roam Electric LTD

- Directors name(s): Mikael Gånge, Filip Lövström
- Location: 6th Floor, Flat 3, Agip House, Haile Selassie Avenue, Nairobi, 00100, Kenya
- Sector: Transport
- Founded: March 2018
- Company website: <https://www.roam-electric.com/>
- Markets: Electric vehicles in Kenya

Roam Electric designs and develops electric mobility products for emerging markets, with a focus on electric motorcycles and electric buses for the East African market. Roam focusses on bringing suppliers, manufacturers and financiers together to enable the deployment of reliable, connected and accessible electric vehicles.

Roam has developed and deployed a variety of electric vehicles. This offer is raising capital for electric motorcycles. These are the first African designed and developed electric motorcycles, and they have been piloted with commercial clients.

Roam's electric motorcycles have been designed to be compatible with locally available spare parts and robust enough for the African use case.

Roam's impact made them a finalist in the 2022 Earthshot Prize - <https://earthshotprize.org/winners-finalists/roam/>

With this money, Roam will be able to increase delivery of the newly launched electric motorcycle Roam Air for motorcycle taxi entrepreneurs and other customers in Kenya. Roam expect that 25% of their electric motorcycles will be used by motorbike taxi drivers who will benefit from cheaper operation and maintenance costs compared to a petrol equivalent. The Roam Air is locally assembled and can be charged in private or public electricity outlets or used with swappable rental batteries, some of which will be operated by the company.

b) Company Impact

Social impact

The most immediate benefit of Roam's electric motorcycles to the businesses and motorcycle taxi drivers who use them will be in reduced costs.

Although the upfront cost of the motorbike is more than the typical 150cc petrol equivalent, Roam have estimated that their electric motorcycles can lower the operational costs by 80% and the fuel costs by 60% compared to a petrol motorbike. Roam's electric motorcycles will support jobs for micro-entrepreneurs, and Roam estimate that their Electric motorbike activities will create more than 20,000 indirect jobs by 2026.

Environmental impact

Replacing a petrol motorcycle with an electric motorcycle leads to an estimated 90% reduction in carbon

emissions, based on figures for the carbon footprint of the Kenyan electricity grid.

Electric motorcycles vs Boxer 150cc*	
Emission from one liter of petrol [kgCO₂/l]	1.50
Consumption Petrol [l/km]	0.046
Consumption electricity [kWh/km]	0.031
Emission from petrol (kgCO₂e/km)	0.069
Emission from electricity (kgCO₂e/km)	0.01
Emission reduction (kgCO₂e/km)	(0.062)
Average distance [km/day of operation]	90
Days of operation [days/year]	320
Annual emission reduction [kgCO₂e]	(1,788.13)
...% carbon emission reduction	90%

Past performance is not a reliable indicator of future results, and potential investors' attention is drawn to the content of section 5 – Risk Analysis Overview.

5. Risk analysis overview

The investment team of Energise Africa ensures that comprehensive due diligence is carried out on each issuer prior to any agreement to raise finance on the platform. This analysis covers financial position, performance and projections, and every organisation must provide audited annual accounts. There is also a focus on operational activities, quality of the management team, clients and market fit, ownership and governance. Proposals for new investments are then assessed and approved or rejected by the Board of Energise Africa.

Risk factors to take into consideration

This section provides an overview of some of the risks associated with this investment opportunity. This is not an exhaustive list. These risks may lead to late repayments or capital loss. Investors should ensure that they have fully understood the risks and assessed their capacity to handle potential financial losses.

a) Risks of investing in unlisted bonds

By investing in a bond, you are lending your money to a business (Roam Electric LTD), with all the risks that this involves. It is also difficult to get out of the investment early. Bonds are 'fixed interest' investments. This means that the interest rate on the money you lend is set in advance. Advertised rates of return aren't guaranteed. This is not a savings account. If the borrower doesn't pay you back as agreed, you could earn less money than expected. A higher advertised rate of return means a higher risk of losing your money. If it looks too good to be true, it probably is.

Don't invest unless you are prepared to lose all the money you invest. This is a high-risk investment and you are unlikely to be protected if something goes wrong.

Don't put all your eggs in one basket. Putting all your money into a single business or type of investment for example, is risky. Spreading your money across different investments makes you less dependent on any one to do well. A good rule of thumb is not to invest more than 10% of your money in [high-risk investments](#).

b) Company risks

If the business you are investing in fails, there is a high risk that you will lose 100% of your money. Most start-up and early-stage businesses fail.

- Competitors may enter the market with superior products/services, suppliers may default or existing players increase market share
- The Company may be unable to raise sufficient future capital to sustain its operations and expansion plans; however, the company has a strong track record of attracting debt and equity in the past.
- Operational costs may rise faster than anticipated.
- Management and key staff turnover could affect the performance of the Company.
- High defaults among customers might occur, resulting in financial losses for the Company.
- Supply chains may be affected by disruptions in international trade and transport
- Climate change or related issues could (in)directly affect the Company's products, operations, customers or suppliers
- Technology risks relating to the use of IT systems could affect the viability of the Company.

c) Risks for Energise Africa

- Energise Africa must adhere to UK Financial Conduct Authority regulatory requirements to have a wind down plan in place to ensure continued operation should the platform go bankrupt. Please note that this does not guarantee the return of your capital or payment of interest.

d) Risks when investing in emerging markets

This section provides a brief overview of political, social and macroeconomic risks that that could influence this investment:

- The Company's main operations are in emerging markets, therefore investors should consider the potential for changes in the political and macro-economic climate. Elections often have an impact on the economic stability of a country and significant changes can create obstacles for foreign investors especially as new regimes might make repatriation of funds difficult/impossible.
- Political instability could have an adverse impact on the economy, the judicial system, financial markets and institutions.
- The risk of corruption could make doing legitimate business difficult.
- Natural disasters tend to occur more regularly in emerging markets and/or the effects have a more profound impact due to lacking emergency (government) responsiveness or general infrastructure.
- Emerging markets may also be more vulnerable to (civil) war or other types of social instability. This is largely related to the economic and political situation of a country.
- Local currencies in emerging markets may be more volatile than major currencies. Even though Roam borrows in GBP and repays in GBP, it has revenue streams in USD and or local currencies. If the local currency were to depreciate, this could affect the Company's ability to repay its hard currency loans.

Operational agreements between Energise Africa and the Issuer

Important Disclaimer: Please note that the 'monitoring' described in this section is performed by Energise Africa for the purpose of allowing the continued use of the Energise Africa Website by the Issuer to raise further investment within an agreed lending facility. This monitoring activity does not form part of the regulated activity for which ShareIn act as regulatory Principal of Energise Africa. This monitoring performed by Energise Africa, which is done after your commitment to invest in choosing to participate in this promotion, provides no additional guarantee that the bond Issuer will be able to meet its obligations to you in repaying your investment or any interest income. This information is provided to aid your understanding of the ongoing relationship between Energise Africa and the bond Issuer and must not be relied upon or influence your decision to participate in this promotion. Do not place reliance on this information when making your decision to invest.

Regular reporting and monitoring data will be made available to EA as per the terms of the agreement between the issuer and EA, which enables the issuer to utilize the EA website for further investment raises within an agreed lending facility.

The Company is required to adhere to certain covenants as stated in the agreements with Energise Africa as set out in Article 6 of the Terms & Conditions.

In certain cases, we may decide to cease the funding flow. If any of the covenants are breached, we may call an event of default¹ or in a serious situation start a workout procedure.

¹ An event of default is a circumstance that causes a lender to demand full repayment of an outstanding debt balance sooner than it was originally due.

Restrictions on sale

The United States

The Notes have not been and will not be registered under the Securities Act. Trading in the Notes has not been and will not be approved on an exchange or board of trade or otherwise by the United States Commodity Futures Trading Commission under the United States Commodity Exchange Act. The Securities may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons at any time. The Issuer will not offer or sell the Notes at any time within the United States or to, or for the account or benefit of, U.S. persons, and it will send to each person to which it sells Notes at any time a confirmation or other notice setting forth the restrictions on offers and sales of the Notes in the United States or to, or for the account or benefit of, U.S. persons.

Each person who enters into a subscription agreement in relation to the Notes with the Issuer will agree, with respect to the Notes being purchased by it, that it will not offer, or sell the Notes within the United States or to, or for the account or benefit of, U.S. persons, and it will have sent to each person to which it sells any Securities a confirmation or other notice setting forth the restrictions on offers and sales of the Securities within the United States or to, or for the account or benefit of, U.S. persons. In addition the Notes will be exercisable by the holder only upon certification as to non-U.S. beneficial ownership. As used in this paragraph "United States" means the United States of America, its territories or possessions, any state of the United States, the District of Columbia or any other enclave of the United States government, its agencies or instrumentalities, and "U.S. person" means (i) any person who is a U.S. person as defined in Regulation S under the Securities Act or (ii) any person or entity other than one of the following:

- (i) a natural person who is not a resident of the United States;
- (ii) a partnership, corporation or other entity, other than an entity organised principally for passive investment, organised under the laws of a jurisdiction other than the United States and which has its principal place of business in a jurisdiction other than the United States;
- (iii) an estate or trust, the income of which is not subject to United States income tax regardless of source;
- (iv) an entity organised principally for passive investment such as a pool, investment company or other similar entity, provided that units of participation in the entity held by U.S. persons represent in the aggregate less than 10% of the beneficial interest in the entity, and that such entity was not formed principally for the purpose of facilitating investment by U.S. persons; or
- (v) a pension plan for the employees, officers or principals of an entity organised and with its principal place of business outside the United States.

In addition, each purchaser (or transferee) and any person directing such purchase (or transfer) will represent and warrant, or will be deemed to have represented and warranted by purchasing or otherwise holding a Security that on each day from the date on which the purchaser (or transferee) acquires the Security through and including the date on which the purchaser (or transferee) disposes of its interest in the Security, that the purchaser (or transferee) is not an "employee benefit plan" within the meaning of UK/1001958/13 - 95 - 243311/70-40108501 Section 3(3) of the U.S. Employee Retirement Income Security Act of 1974, as amended ("ERISA"), that is subject to Section 406 of the ERISA, a "plan" subject to Section 4975(e)(1) of the U.S. Internal Revenue Code of 1986 (the "Code"), a person or entity the assets of which include the assets of any such "employee benefit plan" or "plan," or a governmental plan that is subject to any law or regulation that is similar to the provisions of Section 406 of ERISA or Section 4975 of the Code.
